But as is the case with most things in life, they can be a lot more fun with other people. That's why we've come together as a team to create this, a list of the top 25 best mobile multiplayer games for your iPhone or iPad. As that last paragraph suggests, multiplayer games aren't a genre in themselves. Rather, they incorporate all other genres. Anyway, without further delay, click on the button below to check out our list of the 25 best iOS multiplayer games available for iPhone and iPad. Original article by Jon Mundy, updated by PocketGamer staff. Click Here To View The List » Yes. Hearthstone is a great CCG. The best, even. But moving beyond that, it's a superb title, as you engage endless real life opponents in tactical turn-based battle. Hearthstone is so great, in fact, that there are actual pro-player competitions with hefty prizes! If you're heavy into card games, make sure you give this one a try. There is never a shortage of things to learn and new opponents to beat, so it's an amazing pick to kick off our list! Download Hearthstone With a few million players already part of the game and thousands online at any given time, Wild Rift is a solid name for the online multiplayer mobile genre. This MOBA is highly competitive and with a set strategy in mind from the get-go. Capture the enemy Nexus before they do yours. Sounds pretty simple, right? Well, it's a lot more complicated than that. You'll be teamed up with 4 other players and you'll have to each pick a champion and team up for the ultimate task. It's fun, it's competitive, and you'll never have the same round twice in a row. Download League of Legends: Wild Rift A killer is walking free among us. That's right - it is the epitome of a multiplayer game that has fun as an element, down to its core. It can only be played in multiplayer mode, meaning you'll need anywhere from 4 to 10 people joining in. Then, one or more gets picked as the killer, while the rest have to figure him out. Of course, there is always some foul play involved, and you cannot straight up tell the others that you actually ARE the killer. They might suspect it, but it's all down to the final vote. Definitely make sure to check out Among Us! Download Among Us PUBG Mobile kicked off the whole Battle Royale craze comes to mobile, and it's surprisingly faithful to the source. Whether you're flying solo or riding shotgun with a crew of four, this is a brilliant multiplayer shooter. The player base is immense, as you might imagine with the genre. And if you hop into it together with your friends, it'll only make it even more fun. Of course, you can also play against complete random people online, and hop into the voice chat for better coordination. It's exactly what one will need from one of the best multiplayer games for iPhones. Download PUBG Mobile Death Squared is a slick 3D puzzler that's been designed for cooperative play. One of you takes control of a blue block and the other a red block as you flip switches, block lasers, and more. The best part about this Death Squared, though, is not the gameplay - it must be the characters! The adorable cube-headed critter bots that you control are by far the best element. Then come the puzzles. Since it has been designed with cooperative play at its core, it's definitely worth trying out with at least another friend. It will challenge you to complete some of the most mind-bending puzzles out there. Download Death Squared The latest multiplayer experience comes from Blizzard. We know it's a controversial pick with everything that happened in the last few years, but we can't ignore the great cooperation and delight that Diablo Immortal can provide. You can play it solo, but it's teaming up with others that show the proper playing experience worth of the other titles on this list. Even if your friends can't (or don't want to) play, there are thousands of players to match with through various methods. You can create teams, Warbands, Clans, and of course, ask around through the general chat if anyone would team up with you. Download Diablo Immortal If you've got 2 other friends with iPhones or iPads, make sure you ask them to download Brawl Stars. Then, hop in together and demolish another 3-player team. This 3v3 battle royale is the ultimate challenge, that is guaranteed to give you and your friends a run for your money. There are multiple game modes that have different objectives in mind - that means, you will never get bored with the same setting. The fun characters combined with fast-paced chaotic brawls make this one of the best multiplayer games for iOS right now. Download Brawn Stars Antihero is one of the slickest, most immediately entertaining digital board games on mobile. That it can also be played with others locally or online in casual or ranked PvP is a massive bonus. In other words, it's pretty much combines strategy, role-playing, exploration, and action into a single board game. This sounds like a massive clutter of undefined genres but makes Antihero, in fact, a super fun creation. It's just a tad bit more tedious until you figure out the basics. Afterwards, you can only praise it. Download Antihero A team-based online FPS that makes a series of ingenious concessions for mobile play. That includes a crisp, colourful palette and a hefty dash of Clash Royale's mobile MOBA structure. With all of these elements, one could also argue that it has taken over the internet (more or less). What's surprising is just how beautiful this multiplayer shooter looks and plays on mobile. It's always a joy to hop in! Furthermore, this title never has a shortage of players online, so it will be a piece of cake to find a new round any time, any day, any hour. It's fun, competitive, creative, and easily one of the best iOS multiplayer games. Download Call of Duty Mobile Take to the skies and blow the opposition away in a series of visually opulent dogfights. Storm Raiders 2's generous multiplayer options really help it sing, and the strategic fights always come with a boom. You also have great graphics to keep this title up high, and the realistic missiles add a touch of wow to the game. If you've never tried any of the Sky Gamblers titles, all you need to know is that in this one you'll be basically piloting a WWII airplane and aiming at enemy crafts in a very realistic way. Download Sky Gamblers: Storm Raiders 2 This amazing card title easily deserves a spot on the list. It is, by far, one of the best multiplayer games for iOS devices and no devices at all (by using the physical Love Letter deck). It's a contest where you have to guess the other players' cards or take it to the last round, where the one with the highest number card wins. The actual goal would be delivering the love letter to the Princess. It's much more exciting when actually playing it, especially if you have 3 other friends to join in on the fun. The rounds are short, but there is a lot of replay potential! Download Love Letter It treads the fine line between arcade accessibility and sim-like precision. PGA Golf Tour Shootout makes for a brilliant online putt-off. And it's online that this game's true heart is, which means you'll challenge opponents from all across the world in stylish and realistic golf tournaments. PGA Golf Tour Shootout is the closest it could get to a real-life sports title that you can play on your handy pocket device. So, if you're as much a golf enthusiast as you are mobile games, make sure you give this one a try. Download PGA Golf Tour Shootout from the App Store. Part MOBA, part CCG, all brilliant. There's simply no other PvP strategy on iOS that's as intuitive yet tactically rewarding as Clash Royale. You have to use your strategic thinking brain as much as your PvP skills in order to take down the opponent's units, and then their base. It's intuitive, easy to play (but not that easy to master!) and it makes for a really fun iPhone multiplayer game. Even better when you have a couple of friends to challenge! Download Clash Royale The second slice of charming action-RPG romping comes with the potential for couch co-op multiplayer. Needless to say, it's even more fun with two people. Cat Quest II is as charming as ever, and the catventure is only better with another mate to hop on. While we'd recommend playing on iPads, the slightly smaller screen of the iPhone doesn't exactly reduce the game's quality by much. So no worries - you and your friends will thoroughly enjoy this fluffy adventure. Download Cat Quest II Dreei is a beguilingly odd game that gives you a range of physics puzzles that must be solved by dragging around a bunch of shapes behind your little craft. Many of these puzzles will need the silent assistance of other players, who will be scouting around the same levels. For two players who love their puzzle games, this is a great choice that allows for plenty of creativity and room for error (more or less). That's exactly what makes it such a fun multiplayer game for iPhone and iPad. Download Dreei Clash of Clans is the ultimate freemium world-building on mobile, but it's also a fantastic iOS multiplayer game. You can forge allegiances with other players, but the main appeal is in the well-calibrated matchmaking and battle system. Bonus points if you are a creative individual and figure out some never-before-seen setups that will deem your enemies powerless. It's truly fun, rewards strategic thinking and time spent fighting opponents. It's also got a pretty massive player base, so you'll never run out of new challenges! Download Clash of Clans Let's just say that this is the best mobile game of 2020 according to the player's vote on Mobile Game Awards. If you aren't convinced, we can say that Genshin Impact, is in fact one of the best iOS multiplayer games that you can play in 2022. The graphics is absolutely stunning, the gameplay is crispy clean and it's easy to get gripped into the fantasy world. What we didn't mention is that this is an MMO, where you can lead up to four characters, but one at a time. Character transition will allow you to make some wonderful combos. Of course, you can join in and play with friends too, which is much more interesting. Download Genshin Impact This one is fresh out of the oven. A PC and console conversion of one of the most popular battle royale-shooters is finally out on mobiles, and we have to note that it plays wonderfully. All of the well-known characters are here with the exception of one new Apex Legends Mobile character, which was a really nice surprise. The fast-paced action that's a signature of this title is still there, and for those that can't get used to touch controls, there is a controller support. Still, most players will get used to the touch controls pretty quick, and utilise the weapons and skills like a pro! There are guides for each of the characters on our website, as well as the tier list of best weapons in Apex Legends Mobile, so feel free to use them! Download Apex Legends Mobile Apple Arcade gets its own Battle Royale. Butter Royale lightens things up with a simple top-down control scheme and compact, colourful arenas. Much like every other battle royale and PvP on this list, Butter Royale is a game that you'll have lots of fun playing. It is as challenging as you need a title belonging to the genre to be, and queueing up with your friends will only make it better. Download Butter Royale This mystery murder guessing game is the ideal choice, no matter if you choose to go local or online. Cluedo takes advantage of multiple characters that get tangled up in a murder. You will use cards as well as dice, and you'll have to use very specific strategies to figure out who the actual murderer is. Cluedo has been one of the best iOS multiplayer games for a long time, and if this is the first time hearing about it, make sure to get it and play a round. We guarantee you'll be eager to play it again and again! Download Cluedo The developer of Mucho Party, GlobZ, understands what makes a great same-handset title. It's a series of one-on-one mini-games that utilize the touchscreen brilliantly - and will probably have you fighting your opponent here in the real world too. It is designed for 2 players (that means 1v1), but it also features a whole array of different games with more player options that you can hop onto anytime. From tic-tac-toe (2-player) to HotSeat and League (up to 8 players), you can get your dose of iOS multiplayer games all from a single Mucho Party! Download Mucho Party A brilliant asynchronous board game with an irresistible cat and mouse structure. Whether you're on the royal team or that of the assassins, what follows is an intricate dance of death. It's a two-player title at its core, which is cleverly adapted to the mobile platforms. If you are looking for deception, tactics, and strategy more so than anything else, you should definitely check this one out. It's available to play both with friends or online against a random player, so there's never a shortage of options. Download Kings and Assassins Another mobile survival shooter effort, Garena Free Fire is especially popular for its quick and swift games that are ever-so-unforgiving. There are many elements that make it resemble other popular titles on this list but don't let that fool you. Garena Free Fire is a standalone experience that will keep you looking for the next match every 10-15 minutes. It's a fun survival battle royale with constant updates, new items, and collectibles (weapon skins, fashions and so much more), and if you haven't tried it out yet, make sure you do so. Download Garena Free Fire This fantastic survival horror is similar in a way to Among Us - except... it's a lot bloodier and the killer will clearly stand out among the crowd. The best part about the game would be playing with your friends. The fact that you can spook your friends out in such creative ways makes Dead by Daylight much more worth it (especially for a game night)! The other great elements that make Dead by Daylight one of the best multiplayer game for iPads are the randomly generated maps and custom characters. These two reasons alone will make it ever-so-changing and a truly creepy (and fun - let's be honest) experience. Download Dead by Daylight This stunningly-looking MMORPG definitely deserves a spot on the list. The graphics alone will land it in a tier of its own, but when it comes to gameplay, there are a lot of elements that bring it to the top. It's got room for playing with your friends, designing your own houses, and - why not - even marriage. There are plenty of quests to explore, and the various paths that you can take will shape up your character in unique ways. It's definitely one of the iOS multiplayer games that will keep you playing for a very long time.
